

60 cm Built-in Wine Column H177 Panel Ready Modern Series

RWC177B4TPNP

Designed to keep your wine at its best, this built-in column wine cellar offers a high level of control with 3 temperature zones for red and white wine that cool between 5° C and 20° C. The advanced air circulation system with charcoal-layered filters ensures fresh, pure airflow throughout, maintaining optimal wine preservation.

The intuitive digital touch-control interface allows you to effortlessly adjust the temperature for each zone and customize the interior lighting settings, ensuring optimal conditions and a personalized experience.

Designed to offer elegant configurations of a wine cellar, refrigerator, and freezer, or a combination of a wine cellar and bottom mount, this built-in column seamlessly integrates into any kitchen design. Using one of the 3 available handle kits in Professional, Master and Heritage Series style, these premium built-in column wine cellars integrates seamlessly with all other Bertazzoni appliances into style-harmonized suites for a true, high-performing kitchen.

This Bertazzoni built-in column wine cellar is covered by 2-years warranty.
